Notes

- (1) In this and future reports:
 - (a) All yields from grass, hay, lucerne, clover etc. experiments will be presented as dry matter. This change affects Park Grass Hay, and the hay and lucerne crops of the Woburn Ley and Arable Rotation.
 - (b) For all potato experiments, ware-sized tubers previously discarded because of disease etc., will be included as ware.
- (2) Destruction of potato haulm:

In all cases for 15% (10%) BOV at 100 gallons per acre read undiluted BOV at 15 (10) gallons per acre.
